

Propagation Supervisor – Alpine Alstonville

Alpine Nurseries are Australia's leading Greenlife supplier, and we continue to grow! We lead the market in providing high quality nursery stock with an environmental focus.

Due to ongoing expansion at our Alstonville site we are seeking to appoint a fun, professional and motivational Propagation Supervisor based locally in the Northern Rivers.

As the Propagation Supervisor you will manage a small team along with the end to end process of ornamental propagation including seed germination, vegetative cuttings and finishing plugs.

Desirable criteria for this role:

- Qualifications in Horticulture, Environmental Science or similar.
- Industry experience in similar role.
- Experience in managing climate controlled growing houses.
- Must have a passion for plants and process improvement.
- Demonstrated experience in motivational leadership.
- Must have a high level of forward planning and communication skills.
- A high level of plant identification is essential for this role.
- Experience in managing plant health best practice.

This is a fantastic opportunity for some looking to make a sea change from Sydney or Queensland.

If you are excited by the potential this role offers please email your cover letter and resume directly to danewings@alpinenurseries.com.au an attractive remuneration package will be commensurate with experience.
